1. In Control Panel, open the Mail item.
2. Click Show Profiles.
3. Select your profile, and then click Properties.
4. Click E-mail Accounts.
5. Select View or change existing e-mail accounts, and then click Next.
6. Select the Microsoft Exchange Server account, and then click Change.
7. In the dialog box that contains your mailbox server and user name, click More Settings.
8. In the Microsoft Exchange Server dialog box, click the Security tab.
9. Click to select the Encrypt data between Microsoft Office Outlook and Microsoft Exchange Server check box, and then click OK.
10. Click Next, and then click Finish.
11. Click Close, and then click OK.
