1. Open any web browser and navigate to [http://wpa2setup.ua.edu/CloudPath/](http://wpa2setup.ua.edu/CloudPath/) (URL is case sensitive). After reading the **UA Network Acceptable Use Agreement**, check the box accepting the End-User License Agreement and click **Start**.
2. You will be prompted to install the add-on. Click **Install**. (If you are running Java, this will be a pop-up)
3. A pop-up will appear for you to allow changes to your computer, click Yes. This pop-up may occur multiple times.

4. You will be prompted to enter your myBama Username & Password
5. Once completed, you will see XpressConnect has been loaded.

6. Upon successful connection, your browser will redirect to UA’s homepage.

7. Once connected to UA-WPA2, you will need to forget the other wireless networks. In order to do so, follow the instructions below:

**Windows XP**

- Open Control Panel, select and double click Network Connections.
- Select Wireless Network Connection, right click it and select Properties.
- Choose “Wireless Networks” tab and select existing network in preferred networks, then click Remove. In this case, select “UA Public Wireless or UA ResNet Wireless”.
- Click OK.

**Windows Vista, 7, 8**

- Open Control Panel, click Network and Sharing Center
- Navigate to Manage Wireless Networks in the left pane and right-click on the network you want to remove. In this case, select “UA Public Wireless or UA ResNet Wireless”.
