Secure (Encrypted) Wireless for UA Faculty & Staff

To better protect your communications when you are working on a wireless network connection from your SmartPhone, Tablet, iPad, Laptop, or any other device, we have deployed WPA2 Enterprise, which utilizes your myBama username and password to verify that UA Faculty and Staff use this secure network.

WPA2 Enterprise is easy to set up.
1. From the Wi-Fi options on your device, select UA-WPA2
2. When requested, enter your My Bama ID and Password
3. You will then be connected to UA-WPA2
4. If you experience problems, please contact the OIT Service Desk at 348-5555
